## Experience

### Front End Developer & Designer, Moon Criminal Law, 2013 → 3mo.

Communicated closely with clients to create a design conveying the client's brand. Integrated requested client artwork. Performed minor copywriting. Performing ongoing maintenance and feature enhancements.

### Full Stack Developer & Designer, Feathercoin.com, 2013 → 4mo.

Worked with owner of cryptocurrency having peak market cap of \$29m. Provided consulting for programming and business strategy. Modernized existing site design and improved user experience. Developed an interactive mining calculator and live updating statistics pages using jQuery and JSON-RPC. Integrated live market charts.

### Full Stack Developer, What's To Lose, 2012 → 1yr. 2mo.

Lead development of a weight loss tracking social network for obese users from the ground up using the Pyramid Framework and SQLAlchemy. Integrated Stripe with user accounts to enable product keys and future credit card billing. Created admin panel for managing sales campaigns and tracking user engagement metrics. Developed features such as friends, groups, comments, user profiles, personal metric graphing using Rickshaw.js, notifications, and an automated emailing system.

### Python Web Developer, Halight Digital Interactive Solutions, 2012 → 9mo.

Performed team-based work on internal facing web apps for a Fortune 100 company. Developed employee incentive scoreboard for same company. Worked with a local customer finishing their health industry web application for release. Heavily utilized Django, Git, Redmine, Ubuntu Server, and OS X for development.

### Web Developer & Designer, Absolutely You, 2012 → 3mo.

Worked in a team of 4 to create an informational website focusing on usability and growing a loyal customer base. Developed a method to allow the non-technical owner of the business to update their website by simply clicking the text they want to change and editing it inline. Used MySQL, PHP, and the Aloha HTML5 editor.
