RELEVANT WORK EXPERIENCE

Lead Technical Project Manager   Kodebuilders Software, Toronto, ON — 2014-2015

- Managed an international team of 10 developers, guiding Kodebuilders' 6-month growth from startup to the second largest Canadian contractor on Elance.
- Enhanced sales pipeline, communication, project management, and development practices.
- Main point of contact with high profile clients such as the University of Toronto, translating clients' needs to technical requirements.
- Pioneered a successful all-online workflow using Slack and Teamwork.com that connected employees in 3 time zones around the world.
- Managed upwards of 7 projects simultaneously, increasing productivity and ensuring deadlines met.

Web Developer and Designer   Multiple Contracts, International — 2013-2014

Down to Earth Cleaning

- Developed clean looking design and copytext for a local residential cleaning service on Squarespace.
- Created colour theme using Adobe Color, and graphics in Photoshop using stock photography.

Moon Criminal Law

- Designed and developed website, integrating client artwork and performing minor copywriting.
- Continuing feature enhancements, maintenance, and technical support.

Feathercoin Cryptocoin

- Contacted by owner of cryptocoin to port an online calculator from my personal site to the official site.
- Provided further consulting and business strategy. Improved site design and user experience.

Lead Full Stack Web Developer   Health & Fitness Web App, Oakville, ON — 2012-2013

- Developed social network in Pyramid and SQLAlchemy. Integrated Stripe for recurrent billing.

Python Web Application Developer   Halight Digital, Windsor, ON, 2012

- Worked in a team of 6 developing features and fixing bugs in project management software used internally by a Fortune 100 company.
- Developed an employee incentive scoreboard, interfacing with legacy APIs.
- Worked closely with a client in health industry, completing and releasing their unfinished startup app.
